Education

École Normale Supérieure de Lyon

Lyon, France

PhD student in Computer Science advised by Francesco Bronzino

Mar 2025 – present

- Research focus: System Architecture and Performances, Network Measurements, Security, Privacy.

Université Claude Bernard Lyon 1

Lyon, France

MSc in Computer Science (GPA: 3.9/4.0)

Sept 2022 – Sept 2024

- Specialization in networking and security.

Université de Lorraine

Nancy, France

BSc in Computer Science (GPA: 4.00/4.0)

Sept 2019 – June 2022

Publications

SoK: Mapping the Privacy Landscape of Geolocation Ecosystems

Augustin Laouar, Paul Lachat, Loïc Desgeorges, Mathieu Cunche, Vincent Roca, Pascale Vicat-Blanc, Francesco Bronzino
PETs, 2026

Rethinking Geolocalization on the Internet

Augustin Laouar, Loïc Desgeorges, Paul Schmitt, Francesco Bronzino
ACM HotNets, 2025

Experiences

IPinfo

Seattle, USA

Research Intern

June 2026 – Sept 2026

- Conducted research on IPv6 enumeration using rDNS zone walking.
- Improved state-of-the-art algorithms' efficiency by 124%.
- System implemented in production and a paper is planned to be submitted.

École Normale Supérieure de Lyon

Lyon, France

Research Engineer

Oct 2024 – Feb 2025

- Network performance analysis of wireless IoT devices.
- Developed an innovative and lightweight method for modeling network traffic based on multivariate distribution, improving accuracy by 23% compared to classical methods.
- Implemented this method in an NS3 module (C++).

Université Claude Bernard Lyon 1

Lyon, France

Undergraduate Research Assistant advised by Thomas Begin

Nov 2024 – June 2025

- Security and privacy impact of IoT devices.
- Reverse engineered IoT devices using Ghidra and Wireshark, and found several vulnerabilities.

Viveris

Lyon, France

Network Engineer Apprentice

Sept 2023 – Sept 2024

- Led network infrastructure projects to align company with ISO 27001 standards.
- Reduced infrastructure costs by 25% by using open-source solutions such as OPNSense, OpenVAS and Zabbix.

WorldLine

Bertrange, Luxembourg

Software Engineer Intern

Apr 2022 – Aug 2022

- Developed financial tools using Java Spring and PostgreSQL .

Teaching Experience

École Normale Supérieure de Lyon

Lyon, France

Teaching Assistant

Sept 2025 – present

- Software engineering (C/C++, Python, Rust, Git) for master's and bachelor's students.

Université Claude Bernard Lyon 1

Lyon, France

Teaching Assistant

Oct 2024 – Jan 2025

- Computer networking for master's students.

Projects

Crowdsourced VPN platform | *Go, Rust, Python, WireGuard, ReactJS*

- Currently building a WireGuard-based VPN marketplace.
- Implements AI-driven server selection and load balancing.
- Supports onion routing (multi-hop and packet slicing).

Firefox/Chrome Web Extension | *JavaScript, HTML, CSS*

- Developed and published a web extension to generate and use temporary emails.

Windows Network Monitoring | *C++, Npcap, Windows ETW*

- Developed a network connection monitoring tool in **C++** using Npcap and Windows ETW to extract real-time TCP/UDP flows associated with source processes.

Skills

Programming: C/C++, Rust, Go, Python, Java, PHP, NodeJS, JavaScript, HTML/CSS

Tools: RIPE Atlas, BigQuery, GCS, Wireshark, Ghidra, NS-3, Nmap, AWS, Retool

Certifications: CCNA 1 & 2, CCNA Security, INE eJPT

Languages: French (Native), English (Fluent), Spanish (Intermediate)
